WORK EXPERIENCE

Web Developer | MERN Stack Developer

Cars24 | Feb 2026 – Present | Surat, Gujarat, India

- Developing and maintaining an enterprise-grade vehicle service and marketplace platform with secure vehicle data management, challan and RC data fetching, and car buy/sell functionalities using Node.js APIs.
- Implemented double encryption and advanced security measures to protect sensitive user and vehicle data while collaborating with teams in an Agile development environment.

Backend Developer

Alphaved Pvt Ltd. | Jan 2023 – Feb 2026 | Surat, Gujarat, India

- Developed RESTful APIs that facilitated seamless data exchange between clients and servers in a distributed environment.
- Integrated third-party APIs from external applications into web platforms.
- Manage millions of data points using a load balancer.
- Built APIs and data clients to consume APIs.
- Reduced server response time by optimizing database queries and indexing strategies.
- Mentored junior developers, fostering a culture of continuous learning and skill development within the team.
- Managed efficient SQL queries and data transport.
- Developed secure web applications by adhering to industry-standard security guidelines and practices.
- Analyzed work to generate logic for new systems, procedures and tests.
- I made a P&L system for ICICI Lombard company and Reliance Company named [RGIC](#).
- Also, I made a budget management system, a corporate business management system, an appointment management system, an HRMS, and a CMS.

PROJECTS

- P&L System:** Built a dynamic reporting system of ICICI Lombard company and Reliance Company named [RGIC](#), handling large datasets with optimized backend logic.
- HR management System:** Developed a comprehensive HR management system with features like employee records, attendance tracking, and leave management.
- Corporate Business Management System:** Built Backend APIs a scalable system for managing corporate business operations named [Wegig](#).
- Appointment Management System:** Created a system to streamline appointment scheduling and management.
- Budget Management System:** Developed a system to help users manage and track their budgets effectively and forecasting their data.
- Vehicle Information System:** Developed core functionalities such as RC verification, *Challan* tracking, vehicle data management, authentication systems, and vehicle marketplace operations in this application. [Vehicle Info App](#)

EDUCATION

Bachelor of Computer Engineering

[Bhagwan Mahavir University](#) | Surat, Gujarat, India | 2020 – 2023
